

Daca analizam ecuatiile scrise cu rosu de mai sus, putem deduce urmatoarea relatie:

Pentru matricea A, luam coeficientii de la vectorul de stare (x - x1 si x2) si ii asezam in matrice pe linia 1 - de la x1 si pe linia 2 - de la x2

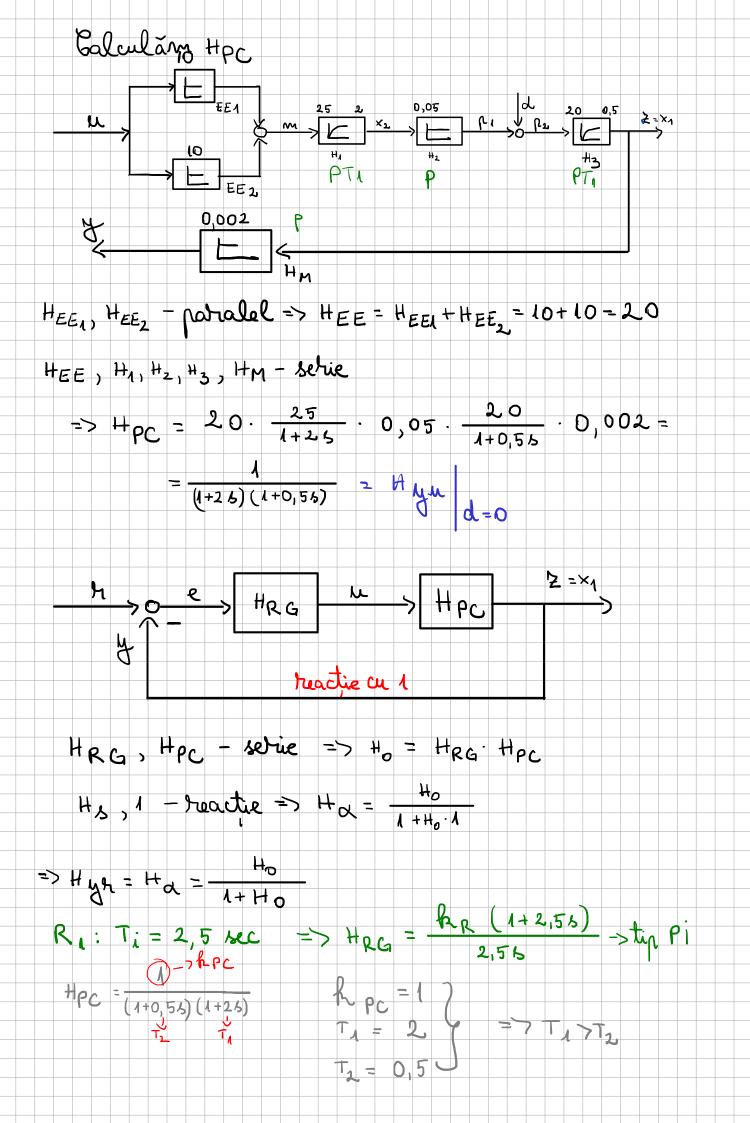

Asemanator procedam si pentru vectorul de intrare (m, d), doar ca pentru matricea B
